

## **Electronic document management and delivery becomes a realistic option for the GP user with the release of Zetadocs for GP 2.0**

London,UK 10:00 20/04/09

Equisys plc, a Microsoft Gold Certified Partner, today announced the UK release of the newest member of the Zetadocs family of software products, Zetadocs® for Microsoft Dynamics® GP 2.0. Supporting both the standard and GB database versions, Zetadocs for GP makes it possible for finance departments in small and mid-sized businesses to make the switch from managing financial transactions on paper over to managing them electronically, delivering significant cost savings and efficiency improvements.

Announcing the release at the Microsoft Dynamics GP Roadshow in Reading UK, Paul Crawley, Equisys Sales Manager, explained the benefits,

“Zetadocs for GP delivers solutions for the document related issues commonly highlighted by Finance Directors and Managers. Firstly, Zetadocs cuts the cost of document delivery through enabling batch processing of electronic invoices directly from GP. Secondly, Zetadocs can improve customer service by enabling non NAV users to track all documents relevant to a sales process to help quickly resolve queries and disputes. Lastly, it enhances document management by storing and linking electronic records of every related document in a transaction for fast retrieval.”

Steve Farr, Product Marketing Manager, Microsoft UK continued,

“The addition of add-on applications like Zetadocs for GP provides more reasons to consider GP as your preferred ERP solution. I would suggest that Zetadocs is something that all GP customers could consider investing in.”

Building on the success of Zetadocs for NAV which was launched in December 2007, and is now delivering cost savings and efficiency improvements for more than 50 NAV customers, Zetadocs for GP incorporates tried and tested Zetadocs functionality including,

- Capture/OCR of existing financial documents - to support on screen approval of accounts payable
- Automated electronic delivery of invoices and statements with customisable delivery options - for faster and cheaper processing of financial transactions
- Electronic storage of all documents relevant to a transaction - to help improve customer service and support query and dispute resolution.

## About Zetadocs for Microsoft Dynamics GP

Zetadocs for GP enhances Microsoft Dynamics GP by enabling users to reduce the dependency on paper in their finance processes by switching to electronic document production, delivery and management.

Zetadocs for GP captures orders, creates invoices, statements, remittances and other financial documents on screen and then delivers them automatically by email, fax or as paper copies dependent upon customers' requirements. It integrates with Microsoft SharePoint to enable secure storage and fast document retrieval by authorized network users.

A typical Zetadocs deployment is very straightforward both for Dynamics resellers and the end user. Standard deployments can be achieved in less than a day yet the configuration options are flexible enough to meet the most complex of document management and delivery requirements.

Zetadocs for GP will enhance any Dynamics business partner's existing value proposition. It enables resellers to differentiate their business, maximise license and service revenues from new business activities and drive incremental revenue from their GP customer base.

## About Equisys

Equisys produces software packages for document production and delivery, including the award winning Zetafax® network fax server and a family of Zetadocs products that includes Zetadocs for GP, Zetadocs for NAV and Zetadocs PDF.

Our software products are designed for small and mid-market businesses, and for departmental use at multinational companies. They stand out from the competition by being simple to install and manage, reliable and great value - backed by outstanding service and support.

We have over 60,000 customers, in more than 100 countries which are served through an international partner network of distributors, VARs, resellers and ISVs.

Our market leading fax server, Zetafax, speeds the flow of critical business documents by enabling users to send and receive faxes on their PCs. It integrates with ERP, CRM, accounting and other applications for automated faxing from those systems, providing auditable records of fax communications.

Equisys was founded in 1987 and has offices in London, UK and Atlanta GA, USA.
