

Microsoft and Equisys announce the availability of Zetadocs Express for Microsoft Dynamics NAV

New downloadable document management module is available at no additional cost to users of the Microsoft Dynamics NAV RoleTailored client who are on a Business Ready Enhancement Plan.

London, UK – October 31st 2011

Microsoft and Equisys today announced the availability of *Zetadocs Express for Microsoft Dynamics NAV*, a new downloadable document management module that integrates Microsoft Dynamics NAV 2009 R2 with Microsoft Office 365 - providing NAV users on a Business Ready Enhancement Plan with key document management capabilities at no additional license cost.

First announced at the Directions EMEA conference in May, *Zetadocs Express for Microsoft Dynamics NAV* is the result of a collaboration between Microsoft and Equisys to combine the capabilities of Microsoft's cloud-based Office 365 suite with Zetadocs' document management functionality. It helps to reduce the mountains of paper used by many organizations and delivers greater business efficiency, improved customer service and lower carbon footprints for Microsoft Dynamics NAV customers.

As the new foundation level edition in the Zetadocs family, *Zetadocs Express for Microsoft Dynamics NAV* maintains the product suite's focus on streamlining everyday business processes such as Invoicing, Supplier Invoice Processing and Proof of Delivery Tracking - delivering three essential document management capabilities:

- **Drag & Drop Storage:** By dragging and dropping any file, email or scanned document directly into Microsoft Dynamics NAV's RoleTailored client, Zetadocs Express for Microsoft Dynamics NAV allows users to automatically store items directly against their relevant NAV record and within SharePoint Online.
- **Save & Send Reports:** Common Microsoft Dynamics NAV reports such as invoices and statements can be emailed to customers via the ribbon or 'Action Pane' – with copies automatically saved for future on screen retrieval.
- **Document Approval:** Simple SharePoint approval workflows can be both started and monitored via the integrated Zetadocs 'FactBox' within Microsoft Dynamics NAV when the customer has subscribed to an Enterprise plan for Microsoft Office 365.

In addition to the above, further automation and customization features such as sending batches of reports by email, or filing documents automatically using barcode recognition, are available via upgrades to the *Zetadocs Essentials* and *Zetadocs Plus* editions.

Speaking of the launch of *Zetadocs Express for Microsoft Dynamics NAV*, Equisys CEO, Chris Oswald said "At its heart, the entire Zetadocs range is about eliminating time-consuming and cumbersome paper-based processes. When you consider the postage costs for each invoice, the average time spent filing and retrieving documents, even the cost of filing cabinets themselves, it's clear that managing paper is inefficient and adds cost to everyday business operations. Our existing customer base is proof that practically all NAV customers could make significant savings by changing their approach to paper.

"As a result we're delighted to have worked with Microsoft to create *Zetadocs Express for Microsoft Dynamics NAV* - not only will it bring further time and money savings to Microsoft Dynamics NAV users, but through its integration with Microsoft Office 365, businesses will be able to benefit from a central, scalable and flexible document library with minimal upfront investment."

Jannik Bausager, Director, Microsoft Dynamics NAV Global Product Management added "We're thrilled to introduce *Zetadocs Express for Microsoft Dynamics NAV* enabling customers using the RoleTailored user experience and on a Business Ready Enhancement Plan to access a number of key benefits. For example, users can now email commonly used reports such as sales invoices directly through the RoleTailored user interface, and the integration with Microsoft SharePoint Online means that documents related to Microsoft Dynamics NAV can be made available across an organization quickly and simply."

Zetadocs Express for Microsoft Dynamics NAV is available to Microsoft Dynamics NAV 2009 users with an active Business Ready Enhancement Plan via Microsoft's PartnerSource and CustomerSource portals. For more information on the full Zetadocs for Microsoft Dynamics NAV range visit www.zetadocs.com.

About Equisys

Equisys produces software packages for document production and delivery, including the award winning Zetafax® network fax server and a family of Zetadocs® products that includes Zetadocs for NAV, Zetadocs for GP and Zetadocs PDF.

Our software products are designed for small and mid-market businesses, and for departmental use at multinational companies. They stand out from the competition by being simple to install and manage, reliable and great value – backed by outstanding service and support.

We have over 60,000 customers, in more than 100 countries which are served through an international partner network of distributors, VARs, resellers and ISVs.

Zetadocs helps users work smarter by creating and delivering electronic documents, streamlining business processes to remove tedious manual procedures and help companies improve the service levels they offer. Zetadocs integrates seamlessly with Microsoft Dynamics.

Our market leading fax server, Zetafax, speeds the flow of critical business documents by enabling users to send and receive faxes on their PCs. It integrates with ERP, CRM, accounting and other applications for automated faxing from those systems, providing auditable records of fax communications.

Equisys was founded in 1987 and has offices in London, UK and Atlanta GA, USA.
