

Why upgrade to Zetafax 2008?

Zetafax 2008 is the latest release of Equisys' award winning network fax software. It continues to be one of the world's leading fax server products, installed in over 60,000 customer locations in 106 countries. If you are an existing customer, Zetafax not only provides support for the latest platforms, it offers a range of new features that makes business faxing more integrated, flexible and efficient.

Support for the latest platforms

Zetafax 2008 supports the latest server platform from Microsoft, Windows Server 2008. It also supports Zetafax Client deployments on Windows Terminal Services and Citrix Presentation Server with Windows Server 2008 both 32 bit and 64 bit versions.

Administrators can now deploy the Zetafax server 32 bit and 64 bit versions of all of the common Microsoft platforms, including Windows Server 2008, Windows Server 2003 and Windows Vista. If you integrate Zetafax with your email system and use Lotus Notes, Zetafax now also supports Lotus Notes 8 and Domino Server.

Improved rendering of Microsoft Office and PDF documents

A further benefit for users that integrate Zetafax with their email system is that it now includes a new conversion engine for MS Office documents.

This native fax rendering engine produces consistently high quality fax images when converting from Word, Excel or PDF. Installation is far simpler as there is no need for the administrator to install or run Microsoft Office or Adobe PDF Reader applications on the Zetafax server. Your document conversion to fax will be more reliable than if you were to continue using Word or Excel and the user licenses for these applications that you free up can be used elsewhere.

Simplified maintenance in a Terminal Services environment

If you use Zetafax with Outlook 2007 in a Terminal Services environment, adding new users is simple and can be done by an administrator in a single step. The Zetafax client is made available to all users on the computer in a similar manner to using a Group Policy deployment of the Zetafax client with desktop users.

Extended hardware compatibility

The range of hardware supported with the latest release has been extended to include the Brooktrout PCI Express range of Primary Rate Interface (PRI) boards.

New time saving tools for Zetafax users

Archive search:

- Users can quickly search for specific faxes in the archive with matching faxes being shown in a single display window
- Saves time that users currently waste searching for faxes and saves the cost of unnecessary resending

Sent Items folder:

- Automatically separates sent items from submitted faxes in the Outbox.
- Provides the user with a separate personal archive of sent faxes which can be searched on a number of criteria.

A worldwide reputation for excellence

Launched in 1991, Zetafax remains a highly reliable and stable product, which is supported across the world in local languages by a network of accredited support staff. Zetafax 2008 upgrades are available from your IT reseller, from the official distributor in your country, or directly from Equisys.

Features overview

Below is an overview of the features that make Zetafax 2008 easier than ever before to install, manage and use.

| What's the feature? | What does it do? | What's the benefit? |
|---|--|--|
| Support for new platforms (Windows Server 2008, Windows Server 2003 64 bit, Lotus Notes 8 and Domino) | Enables Zetafax to be aligned with other office applications in the migration to new platforms | <ul style="list-style-type: none">• Minimizes admin overhead & cost• No impact on Zetafax users |
| Improved rendering for MS Office for email users | Converts Excel, Word or PDF documents into faxes at the Zetafax server | <ul style="list-style-type: none">• Simplified set up and greater reliability of document rendering• No need to deploy MS Word, Excel or Adobe PDF reader on the Server |
| Improved support for Terminal Services | Install Zetafax client for all users in a single operation. | <ul style="list-style-type: none">• Minimal admin overhead when setting up or adding new users |
| Extended hardware compatibility | Support for Brooktrout PRI PCI Express boards | <ul style="list-style-type: none">• Wide range of board types supported for all business scenarios |
| Zetafax Client Sent Items folder | Enables users to separately identify sent items | <ul style="list-style-type: none">• Users spend less time searching the entire archive to look for a sent fax |
| Zetafax Client Archive Search | Provides matches to a search based on set criteria | <ul style="list-style-type: none">• Less time spent searching for faxes• Fewer resends of faxes |
| Improved sending for scanners | Users can send faxes in a single step adding recipient details and coversheets | <ul style="list-style-type: none">• The security and reliability of Zetafax for companies with multiple users but limited numbers of PCs |

Document automation

One of the Zetafax options is Zetafax Duo. As well as managing faxes, Zetafax Duo can also automate common document creation and delivery processes.

Technical Specifications

Zetafax Server:

Windows Server® 2008 (32 bit & 64 bit), Windows Server 2003 (32 bit & 64 bit), Microsoft® Small Business Server 2003 (32 bit & 64 bit), Windows Vista™ Business, Enterprise or Ultimate Edition (32 bit & 64 bit), Windows® XP Professional (32 bit).

Zetafax Client:

Windows Server® 2008 (32 bit & 64 bit), Windows Server 2003 (32 bit & 64 bit), Windows Vista™ Business, Enterprise or Ultimate Edition (32 bit & 64 bit), Windows® XP Professional (32 bit).

Windows Terminal Services or Citrix Presentation Server™ 4 and 4.5 with Windows Server 2008 (32 bit & 64 bit) or Windows Server 2003 (32 bit & 64 bit).

Zetadocs Client:

Windows Vista Business, Enterprise or Ultimate Edition (32 bit & 64 bit), Windows XP Professional (32 bit).

Windows Terminal Services or Citrix Presentation Server™ 4 and 4.5 with Windows Server 2008 (32 bit & 64 bit) or Windows Server 2003 (32 bit & 64 bit).

Integrates with Microsoft Office Outlook® versions 2003 & 2007, Lotus Notes® 6, 6.5, 7 & 8 and SMTP email systems. Supports PDF attachments created in PDF 1.2, 1.3, 1.4 and 1.5 standards.

Zetafax Email Gateway:

Microsoft Exchange Server 2003 & 2007, with Microsoft Outlook version 2003 & 2007. Lotus® Domino® 6, 6.5, 7 & 8. SMTP email systems.
