

Zetadocs for NAV - Collections management

Reduce the pain of collections management by presenting the right documents to the right people at the right time, encouraging earlier dialogue which allows faster dispute resolution and payment.

Each day we are saving at least 2 working hours with Zetadocs. This equates to 1 week every month. As well as making life easier, we have reduced our delivery costs and fine-tuned our order-to-cash process.

Debbie Tabrett, Credit Control Manager, Man and Machine Ltd.

Effective collections processes are critical to the financial stability of your business. Automating these processes can help you speed up dispute resolution, encourage dialogue with customers and remove barriers to payment, as well as saving your business a small fortune each year.

Zetadocs for Microsoft Dynamics NAV is an electronic document management and delivery software solution that reduces the time and costs associated with sending, processing and archiving documents, emails and faxes. It can help you improve your collections management.

Speed dispute resolution

Ensuring that the right people have access to the right documents at the right time is essential to quickly resolving any disputes. If documents are stored in multiple locations or only accessible to certain staff, dispute resolution can become hindered which leads to delays in payment and dissatisfied customers.

Zetadocs automatically archives documents sent from NAV, and also allows inbound documents, faxes and emails such as order amendments or proof of delivery to be captured and centrally held for instant, on-screen retrieval. Making all of this information available to NAV and non-NAV users alike then allows the dispute to be resolved without delay, reducing debtor days.

Overcome customer side inefficiencies

Delays in receiving payment can also be caused by inefficiencies at your customer's site. For example, miscommunications between departments at your customer can lead to disputes or queries that could have been avoided, and lost invoices result in delays in payment.

It may not be immediately apparent how these issues can be tackled. However, with Zetadocs you can automatically attach documents such as copy invoices, order amendments, terms and conditions or Proof of Delivery (PoD) to ensure your customer has all the information they need to approve payment.

The benefits of Zetadocs

- **Speed dispute resolution** by ensuring that the right people have access to the right documents at the right time.
- **Overcome inefficiencies in your customer's business** by ensuring they have all the information they require to hand.
- **Encourage dialogue with customers** to resolve payment issues early and reduce debtor days.
- **Significantly lower your costs** by delivering and filing documentation electronically to cut out printing, postage and related filing costs.

Encourage dialogue with customers

The delay in paper-based documents reaching the customer means that communication is often one way, with collections teams having to chase details of when payments will be made.

Delivering these documents immediately via email encourages a response from the customer, raising issues early or advising of when payment will be made. Zetadocs also allows you to quickly and easily capture these responses via a simple drag-and-drop interface, ensuring that all information is held securely against the customer record in NAV for instant retrieval when chasing payment or handling queries. Statements can be sent in batches in a matter of seconds, meaning that they can be sent more frequently to encourage greater dialogue and earlier payment.

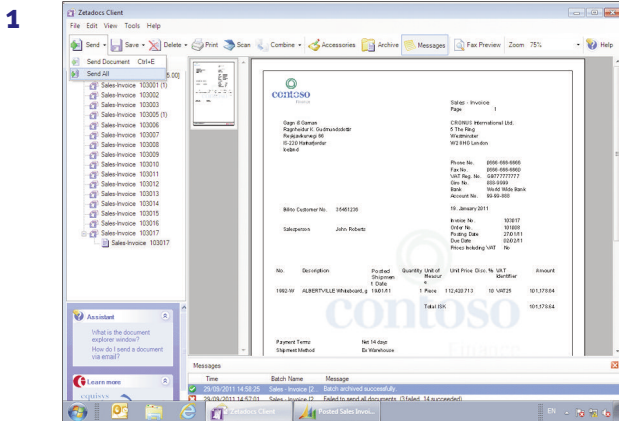

Significantly lower costs

Aside from the initial invoice run, the cost of sending statements, reminders and copy invoices in terms of paper, consumables and postage can be considerable. Couple this with the time it takes to send documents and retrieve information from a paper-based filing system, and the whole process becomes extremely expensive.

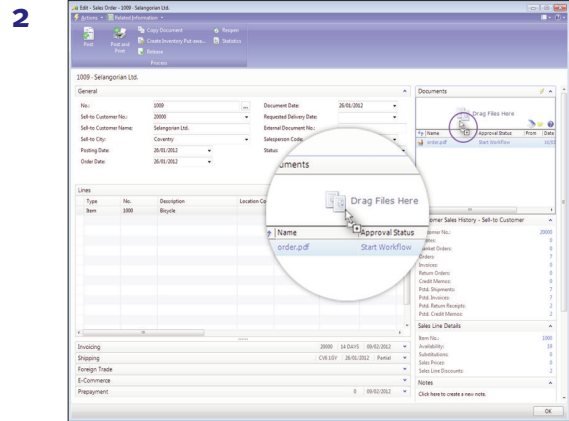

Delivering documents electronically with Zetadocs eliminates the cost associated with stationery and postage, as well as saving time spent collating, packaging and posting. Zetadocs also holds all information in a central, electronic repository which eliminates time spent searching for documents.

Collections management with Zetadocs

Zetadocs personalizes statements and invoices and automatically delivers them in batches via email. These documents are stored for instant retrieval.

Incoming emails, faxes and documents can be 'dragged and dropped' onto the NAV record to create an electronic archive of all information relating to the record.
