

Timemaster is software designed for the built environment: architects, engineers and consultants.

Time recording, expenses, project management to resource planning, it works with your current business processes and centralizes them into one single system, customized to work the way you do.

Timemaster allows you to refocus your business, refine efficiency and concentrate on design.

Timemaster helps maintain the sustainability of your business, giving you the system to manage risk and change.

Sustainable business processes

- Reduce the risk of human error or systems failure.
- Keep your projects on target and profitable by monitoring live progress and resourcing.
- Set-up reports and templates on implementation so that your project team are tracking consistently and in the same way.
- On-demand reporting as you require them.

Timemaster customers deliver 85% of their projects on-time by making better decisions about which resources are available and capable of completing a project against a build industry average of 74%*.

Optimize fee-earning potential

Future-proof your business processes within one centralized and supported system.

Timemaster customers are typically achieving above average chargeability rates of 76%; 9% better than the build industry average of 67%* as it allows you to predict anticipated workload and future profitability with real-time cost calculations.

Improve and maintain the health of your business

Make better decisions faster with rich and real-time management information.

Know that you are working with up-to-date information.

Pre-configure reports so management information is quicker and easier to obtain.

Insights are quicker and easier to retrieve so you and your team can focus their time on design and your core business.

“

Knowing instantly what we have to invoice and the resources we have available for upcoming projects are key to our studios profitability.

Alice Laws, Operations Manager
 Feilden Clegg Bradley Studios

Your processes, more efficiently

Designed to work how you work.

Timemaster makes it simple for you to focus on the business of design.

Your designs are sustainable and Timemaster ensures your business is also sustainable.

Full integration with your current systems.

Simplify the client invoicing process

Reduce the effort required to invoice your approved Work in Progress and make it simple to generate client invoices more often and automatically.

Designed to work with your business with flexible features which can be customized according to your business needs and processes.

“
 Timemaster has become an essential part of our business. It gives us the power to make sensible decisions on projects, ensuring that all our projects are run to a profit. Since implementing the software, our efficiency has increased along with the profitability of the business. It would now be impossible to run this business without the use of Timemaster”

Carl Zdziebczok, Adam Architecture
