

Zetafax Enterprise Edition

The most scalable and comprehensive network fax solution suitable for any enterprise requiring 100 or more users.

The Zetafax Enterprise Edition is the complete solution for larger organizations, no matter how widely distributed your business or how sophisticated your fax requirements. It is ideal for organizations requiring a reliable, scalable and versatile network fax solution without restrictions on numbers of servers and lines. The Zetafax Enterprise Edition enables high volume faxing across multiple locations.

Fast and easy installation and configuration

The Zetafax Server is installed quickly and simply with a four step installation and configuration wizard. Zetafax supports Group Policy, so Zetafax Clients can be deployed quickly to multiple desktops using a single, centralized install.

A choice of intuitive faxing interfaces for users

Zetafax users can fax from Microsoft Outlook, Lotus Notes or SMTP email clients and Microsoft Office documents. The included SMS Gateway provides desktop text messaging.

Integrated faxing with the software of your choice

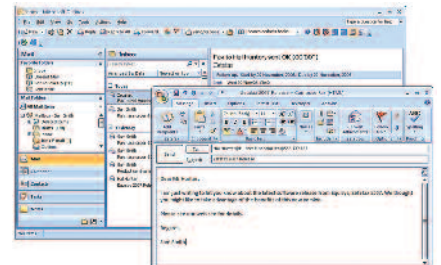

The included Zetafax Automation Toolkit enables faxing from virtually any other software applications.

Rich administration and management features

The Zetafax reporting tool lets you keep full fax log records, allocate charge codes and create audit trails. Fax usage can be billed to specific departments or external clients. Least Cost Routing (LCR) enables faxing between servers on a WAN at minimal cost.

Zetafax also supports Windows child domains and Exchange cluster environments. Fax servers can be managed from a single location using remote monitoring, queue management and the MMC configuration module. The Zetafax Client can be installed on an application server so network users in branch offices can be fax-enabled via existing thin client sessions over a WAN.

The Zetafax Enterprise Edition is ideal for organizations requiring a reliable, scalable and versatile network fax solution with unlimited servers and lines.

Zetafax integrates with Microsoft Exchange and Outlook, Lotus Domino and Notes and SMTP email clients.

Administrator feature highlights:

- Support for Group Policy, allowing centralized installation of multiple clients
- Choice of manual or automated routing of inbound faxes to individual PCs and network printers
- Fax queue management for aborting, holding or rushing of faxes
- Support for a range of fax hardware including V.34 modems, intelligent fax boards and Fax over IP (FoIP) devices
- Supports clustered Microsoft Exchange server environments, Windows child domains and Least Cost Routing (LCR)
- Allows automatic user account creation
- Do not dial control to prevent user dialing of barred numbers or prefixes
- Junk fax filtering of identified Junk senders
- Reporting module provides full fax log records, charge codes, audit trails and archiving features
- Active Directory integration: the Zetafax Client checks Active Directory for the server's location, so no client reconfiguration is needed at the desktop

User feature highlights:

- Intuitive fax client with address book, system tray alert, preview pane and customizable shortcuts
- Ability to fax direct from Microsoft Office documents, Email Client and any application enabled with the Zetafax Automation Toolkit
- SMS text messaging from the desktop
- PDF document conversion, for forwarding of inbound faxes to any PC user
- Broadcast fax capability with advanced embedded addressing for easy management and personalization
- Multi-doc feature for combining multiple documents such as letters and spreadsheets into a single fax
- Client archive search for instant retrieval of archived faxes
- Choice of addressing options from the integrated Microsoft Outlook address book and Zetafax private and public address books
